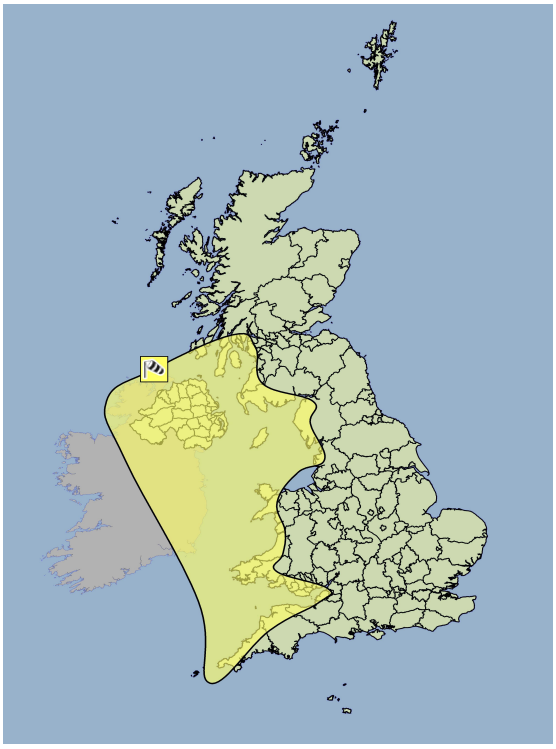
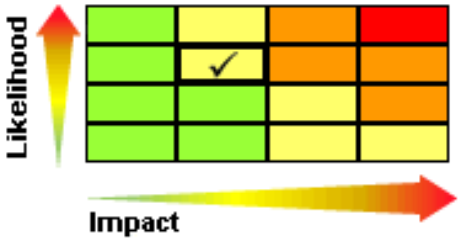
National Severe Weather Warning Service





Chief Forecasters Assessment
A deep Atlantic low will move north close to western parts of the UK on Saturday. Associated very strong winds together with bands of squally showers will affect many parts but particularly western areas. The combination of strong winds, large waves and high tides will lead to hazardous conditions at times in some coastal areas. Winds will ease from the south later on Saturday but remain strong in the north into early Sunday.

The Met Office have issued a **Yellow Alert** of **Wind**

Valid from **06:00 on Sat, 01st Feb 2014** until **06:00 on Sun, 02nd Feb 2014**

Winds will increase on Saturday, with gusts widely to around 50-60 mph, and perhaps to around 70 mph in exposed parts of the north. Additionally large waves could overtop coastlines. The public should be aware of these hazards.
